# Advance information November 2022 

GCSE Mathematics (8300)

## Version 1.0

Because of the ongoing impacts of the Coronavirus (COVID-19) pandemic, we are providing advance information on the focus of November 2022 exams to help students revise.

This is the advance information for GCSE Mathematics (8300).

## Information

- This advance information covers all examined components.
- There are no restrictions on who can use this.
- The format/structure of the papers remains unchanged.
- For each paper the list shows the major focus of questions.
- The information is presented in broadly specification order and not in question order.
- You are not permitted to take this advance information into the exam.
- There are separate lists for Foundation and Higher tiers.

## Advice

- The following areas of content are suggested as key areas of focus for revision and final preparation, in relation to the November 2022 examinations.
- Students and teachers should consider how to revise other parts of the specification, for example to review whether other topics may provide knowledge which helps your understanding in relation to the areas being tested in November 2022.
- Students will be credited for using any relevant or appropriate knowledge from any topic areas when answering questions.
